Dust Guard

100% Automatic Filter Cleaning, HEPA Gasoline - 1,104 CFM

Division of Scott Electric • 412-605-2992

No Manual Shakers, Reverse Air Pulse
or Electronic Solenoids to Replace

Large Volume Dust Collector

- ! **33 Gal Collection Bin**
 - " Saw cut 3,000 lineal feet before thinking to empty the bin (@ 1-1/2" depth-of-cut)
 - " Line the bin with 6 mil bags & zip tie for easy, fast and safe disposal
- ! **HD Strong, Solid Steel Construction** — with lifting bolt on the top of the vacuum to transport the CVG1 anywhere
- ! **Powerful Suction Maintained**
 - " 100% Automatic & *Continuous* Filter Cleaning
 - " Continuous self-clean operation — even prevents sticky powders (i.e. terrazzo) from accumulating on the filter's surface
 - " PTFE membrane further enhances the filter's efficiency rating, dust release ability, prevention of surface blinding and increases the filter's life
- ! **Power: Honda GX200 Engine, 6.5 HP, Key Electric Start**

FEATURES

- ◆ Designed for the contractor who requires a large amount of dust containment
- ◆ *NEVER-FAIL* Self-Cleaning Filter - automatically and constant filter cleaning — *requires no operation intervention*
- ◆ Dump lever lowers the 33 gal collection bin, equipped with 3" rubber casters for easy disposal of debris
- ◆ 5" outlet and hose allows for maximum air volume, 2" & 3" hose reducers available for smaller tools
- ◆ Less filter cleaning, larger dust collection, easier disposal of debris, easy maintenance - all designed for increased production, the adaptability to all dust shrouded equipment provides versatility.
