Skid Plates: Always Check the Skid Plate Before Sawing! Look for wear on the bottom side of the skid plate, typical life is at least 3 blades. If the blade slot is no longer a straight line the skid plate must be replaced. Elite blades do not include a skid plate. We know for certain that our skid plates do not wear-out per blade nor are they the central key for chip-free edges ~ the material, manufacturing and quality control of our blades is the key. There is no need to replace a skid plate per blade - don't waste your money and let's help decrease environmental waste. We offer both types of skid plates as follows:

Skid Plate w Clip - for Newer Soff-Cut Saws		Price	Free Skid Plate	Skid Plate w Pin - for Older Soff-Cut Saws		Price	Free Skid Plate
