SYNTHETIC RESINOID TECHNOLOGY

SlimCut SRT— High Performance Wafer Blade Cuts Iron, Metal, Stainless Steel, Welds, etc.

- **Outlasts Metabo Slicer Wheels 10 : 1**
- Cut thin, thick gauge metal, rebar, brick lintels, flat and bar stock, tubing, etc.
- Proprietary SRT grain and bond mixture for fast cutting and significantly longer life
- High performance design for fewer wheels changes, reduced down time, lower cost per cut.

## TEST STUDY:

Metabo's *original* Slicer is the most dominate thin cut-off wheel in the market.

COMPARISON / APPLICATION: **Pearl SlimCut SRT vs. Metabo Slicer**

- Removal of a wood burning cast iron fire box, to be replaced by a gas fireplace insert
- With a stock of Metabo 6" Slicer wheels the firebox, welds, bolts and iron attachment brackets were cut
- As the wheels disintegrated within two (2) minutes we switched to Pearl's 6" SlimCut SRT
- Result:
  - ▶ Performance: Same smooth, fast cutting performance as the Metabo
  - ▶ Difference: One (1) SlimCut SRT wheel was used to finish the project, easily outlasting Metabo 10:1!

## Knotted Wire Cups

- ▶ Provides fast, heavy-duty brushing action
- ▶ Engineered for use on production equipment, angle grinders, portable power tools

### APPLICATIONS:

- ✓ Heavy-duty cleaning of large metal surfaces
- ✓ Cleaning prior to welding
- ✓ Weld scale and corrosion removal
- ✓ Rust and paint removal
- ✓ Roughening
- ✓ Deburring
