

Diamond Polishing – Semi-Metal & Resin Pads

3" RESIN PADS

- 100% high quality resin bond for extra durability and producing the highest quality finish under the heaviest machines
- Lower grits (50 - 200) are metal impregnated (semi-metal)
- For use on all surfaces: concrete, marble or granite, terrazzo, engineered stone.
- Wet or dry use. Velcro backing.

3" SEMI-METAL TRANSITIONAL PADS

- Used after the metal bond tools to remove their scratch pattern, followed by the resin tools
- Premium grade for extra durability and long life under the heaviest machines
- Very aggressive and great for transitioning between the metal and resin steps
- For concrete, terrazzo, marble and granite. Velcro backing. Wet use.

3" COPPER TRANSITIONAL PADS

- Aggressive, will quickly transition the gap between the metal bond diamond tools and the resin polishing pads
- Premium quality 3" pucks with high diamond concentration to remove metal bond scratches
- Can be used as a economical alternative to the finer metal bond tools
- Copper resin combination for longer life and heat resistance
- For concrete or terrazzo. Velcro backing. Wet Use.

3" CERAMIC TRANSITIONAL PADS

- Aggressive ceramic bond provides metal cutting performance on tight troweled floors with minimal swirl marks
- For use on concrete (soft, hard or medium) and terrazzo. Velcro backing. Dry use only.
