## Dust Guard

Div. of Scott Electric • 412-605-2992, #Direct

# Air Pulse Vac Bag

## Self-Cleaning, Heavy-Weight

### HD Stitched-On Connection Collar

## Unstoppable Performance — Fits 9-17 Gal Tanks

The Original: Universal — Fits Most Silica Dust Extractors & Wet / Dry Shop Vacuums

Superior Durability w Stitched-On Cardboard Collar:

100% Fill Capacity • No Tearing • Use Less Bags • Work Longer • Cartridge Filters Stay Clean

Increase Production: Suction Sustained, Larger Collection Yields, HEPA Filters Stay Clean

Heavy-weight bag inflates & deflates, self-cleaning itself when vacuum is turned on and off and during filter cleaning cycle with automatic self-cleaning dust extractors. Dust is effectively released, powerful suction is assured, cartridge filters stay clean.

OSHA  
SILICA  
RULE

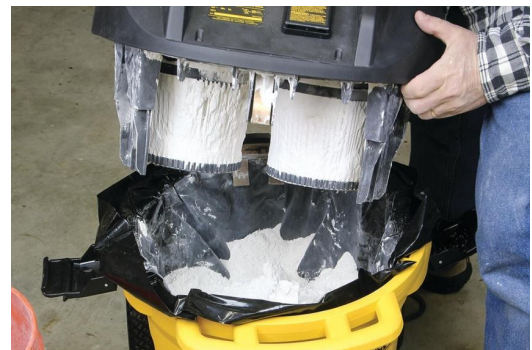

Breathe Safer  
OSHA Compliant

### Prevents Filter Mishaps:

Regardless of the project or the vac being used, *you can't afford the filter bag to burst* ----- >

### Exceptional Durability, Unmatched Filtration Efficiency

1. The outside of the bag stays clean  
- HEPA Cartridge Filters Stay Clean
2. Air Pulse Filter Media - used in a myriad of industries including clean rooms, hospitals and laboratories
3. Total Seal - contains ultra fine powders, microscopic particles, allergens. Providing unmatched filtration efficiency. Vacuum cold fireplace ash using a standard wet/dry vac - *without the risk of dust escaping into a room*
4. HD Strength – will not prematurely burst inside the tank even if over filled - *will not tear or burst when tossed in a dumpster*
5. Sealable Bag – meets EPA/RRP, OSHA Silica Dust regulations for handling & disposal of hazardous debris
6. Versatile - *collect anything at the same time*: ultra fine powder, sharp objects, moist debris, rotten food, hot mastic, creosote, etc.

SPECIFICATIONS — Stitched Cardboard Collar - allows bag to exceed collection yields without tearing or bursting:

- 2.5" ID Collar - fits 9-17 gal wet/dry vacs & dust extractors with a 2-1/2" OD (outside diameter) deflector port
- Fits: Bosch (all models including 300 CFM vac), Dewalt (both models), Dust Director®, Dustless, Fein, HEPA Pro, Hilti 300 CFM Vac, Makita, Milwaukee, Nilfisk, Ridgid, Shop-Vac, etc.

PRICING — PN: 136514

\$78.00 / 5 pk • \$700.00 / 50 case.

# HD Micro-Fiber Vac Bags (2)

HEPA Rated: 99.97% Efficiency @ 0.3 Micron

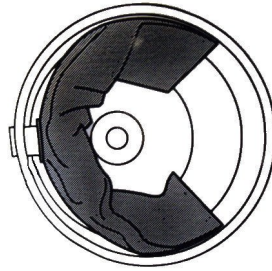

HD Urethane Gasket Collar — Wet/Dry Collection, Universal Fit

OSHA COMPLIANT ■ SELF-CLEANING ■ HEAVY-DUTY

## HEPA, Micro-Fiber Collection Bag

- ◆ Universal Fit — for all shop vac tank style vacuums. Fits inlet deflectors (inside the tank, right) with a outside diameter between 2-1/4" to 3".
- ◆ HEPA rated @ 99.97% efficiency @ 0.3 microns
- ◆ Fully enclosed bag, acts as a pre-filter to prolong the life of the main filter and minimize dust exposure during disposal
- ◆ Natural, self-cleaning action - maintains the vac's powerful suction
- ◆ Outperforms dust extractors with semi-automatic and automatic self-cleaning filters
- ◆ Self-cleaning - uses no electronics to prevent filter blinding
- ◆ Everything stays clean: outside of the bag, tank, cartridge filter
- ◆ Collects anything at the same time: Ultra fine powders, moist debris, liquids, sludge, slurry, rotten food waste, creosote, sharp objects (glass, nails, metal), wood dust, etc.
- ◆ **Connection Collar, HD Urethane Gasket:** structurally reinforced, urethane gasket, snaps and holds securely, provides a 360° water and airtight seal around the vacuum's deflector port (inside the vacuum tank.) Gasket seal maximizes containment, prevents leakage. Designed for ultra fine dust and liquid — extraction and containment.
- ◆ **Seal-Tight Cap:** locks into the HD Urethane Gasket, completely sealing the opening. Provides a secure seal for safe handling during disposal of hazardous waste material such as silica, lead, asbestos, microscopic particles, allergens.
- ◆ **Durable Synthetic Filter Media:** prevents suction drop while vacuuming ultra-fine powders, retains its strength and filtration efficiency while vacuuming liquids and heavy-weight wastewater.

**SPECIFICATIONS** — Structurally Reinforced Urethane Gasket, Provides a Secure, Watertight Seal, Designed to Vacuum both Ultra Fine Powder and Wastewater.

- Pliable gasket installs onto the deflector port inside the vacuum's tank.
- Fits: Bosch (all models including 300 CFM vac), Dewalt (both models), Dust Director®, Dustless, Fein, HEPA Pro, Hilti 300 CFM Vac, Makita, Milwaukee, Metabo, Nilfisk, Ridgid, Shop-Vac, etc.
