CleanSpace SMART App

Smart Technology that tracks your respiratory protection

- Giving wearers control and visibility of their lung protection.
- Accessing tools to check the set-up and use of their respirator.
- Displaying real-time respirator information: wearer protection score, battery charge remaining (%), available filter remaining (%), Filter used (mins).
- Allowing wearers to set the use time for a gas filter (estimate provided by site).
- Reporting available for sites wishing to integrate respirator usage into their workplace compliance program.
- Free to download from Apple and Android stores.

Getting started with the CleanSpace SMART App

LOG-IN

First, download the CleanSpace SMART App from the app store and login.

PAIR

SET UP &
CHECK

Then, pair the CleanSpace SMART App and start the set up:

STEP 1: INSPECT all the parts to ensure that there are no visible signs of damage.

STEP 2: ASSEMBLE the components - power unit, mask and filter.

STEP 3: DON by switching the respirator into STANDBY mode and fitting the respirator.

DASHBOARD

After approximately 1 minute, the Dashboard display will update and show the respirator's connection status, battery status, overall filter status, alarm status and your mask protection score.
