Grind Mortar, Grout & Epoxy

Specifications: 3.85" OAL, 2-3/8" Cutting Radius
2" Depth-of-Cut, 3/32" Blade Thickness (.0937)

Features / Benefits.

- Blade's shape and dimensions are ideal for aggressive grinding, reaching into tight areas and finishing a diamond blade's cut without over cuts.
- Wave tooth design kicks away debris to provide superior performance, cutting speed and life compared to a smooth, diamond coated blade - see photo, right.
- Very smooth cutting performance – exceptional on thin butter joints or heritage restoration projects, best tool to prevent chipping of the adjacent brick or stone.
