Advanced Personal Respiratory Protection

The Gold Standard for Respiratory Protection, Comfort & Cost Efficiency!

Experience the *highest standard* in respiratory protection, comfort *and cost savings* with the CleanSpace® Battery Powered Air-Purifying Respirators (PAPRs).

Key Features:

✓ Advanced Breathing Technology:

- > **AirSensit™:** Filtered air just isn't supplied (as it is with other PAPRs), with a CleanSpace PAPR the user's breathing is monitored and the airflow is adjusted in real-time to match their breathing pattern.
- > **Filter Change Alert — Filter Life:** Knowing when to change a filter is an important part of any respiratory protection program. The Filter Change Alert is triggered when the filter exceeds its service limits and needs to be changed.

✓ Cost Savings:

Use your existing PPE – power units don't need to be replaced, just the mask for new users.

✓ Ultra-Lightweight, Compact & Streamline:

CleanSpace PAPRs weigh less than 16 ounces, they're the lightest and most comfortable PAPRs on the market — *minimizing fatigue and maximizing user comfort*. Plus no cumbersome helmets, hoses or belts, ensures ease of use & mobility in any environment.

✓ Half-Mask Comfort:

Made of soft silicone cushion that readily molds to the face, does not cause allergic inflammation or irritations, quickly clips onto the power unit, easily un-clips for cleaning.

Product Range / Comparison

CleanSpace PAPRs

Model	WORK		PRO		EX		ULTRA	
Particulate HEPA Filter Gas Filter	Blue	Blue	Black	Black	Yellow	Yellow	Orange	Orange
Half Mask Full Mask	Blue		Black		Yellow	Yellow	Orange	Orange
